## **Participation in Project Work**

**Esmaeili Arezoo**

**Project Work Course 2022**

**Topic:**  
**Sensorised harness for safe biomechanical treadmill testing**

Master's Programme in Automation and Electrical Engineering (AEE)  
Course code: ELEC-E8004 (2022), 10 ECTS credits.

The project work is conducted in a group of three to five students. The students complete a project where they create a project plan, take care of the project implementation and evaluate business-related matters of the project.

The project topics are based on the research undertaken in the Department of Electrical Engineering and Automation. An instructor working in the research area of the topic supervises the group.
